

Radiopaedia Founder Frank Gaillard Passes the Torch

[Melbourne, Australia] – [25 September 2024]

After 19 years at the helm, Radiopaedia founder, Associate Professor Frank Gaillard is stepping down as editor-in-chief, handing over the reins to Dr Henry Knipe.

Henry, a consultant Radiologist in Hobart, completed his training with Frank at The Royal Melbourne Hospital. He has been a key member of the Radiopaedia team since 2012 and has served as editorial director for several years.

Frank Gaillard will remain deeply involved with Radiopaedia, ensuring continuity and continued growth of the platform. "I'm not leaving, just changing roles," Frank emphasises, reflecting his ongoing commitment to Radiopaedia's mission.

Dr Henry Knipe, the new editor-in-chief, brings extensive experience and a deep understanding of Radiopaedia's vision. His leadership will continue to drive the platform's mission to create the world's best radiology reference available, free for all, forever.

About Radiopaedia:

Radiopaedia is a peer-reviewed, open-edit educational radiology resource that has become a cornerstone of medical education worldwide. Founded in 2005 by Frank Gaillard, it has grown to include over 60,000 cases and 16,000 reference articles. In 2023, Radiopaedia served 320 million pages to 40 million individuals from every single country on earth, demonstrating its significant global impact, particularly in low and middle-income regions that often lack adequate educational resources.

Quotes

Associate Professor Frank Gaillard

"I see making Radiopaedia a self-sustaining resilient organisation as a priority over the next five years. A key component is ensuring that we have the right people in each role. The editor in chief is a critical part of our site and Henry is the perfect person to take on this position."

Dr Henry Knipe

"Stepping into the role of Editor-in-Chief at Radiopaedia, following in the footsteps of my mentor and now friend, Frank Gaillard, is both an honour and a challenge. Frank has set the bar high, and I'm excited to build on his incredible work. Together, let's continue Radiopaedia's mission of making the best radiology reference the world has ever had and make it available for free, for ever, for all!"
